

Making Homemade Oxyops Collectors

By Ken Gioeli
Extension Agent II / Natural Resources
St. Lucie County Cooperative Extension
ktg@mail.ifas.ufl.edu

Supplies Needed:

- (1) 2 ½ Quart Plastic Mixing Container with Lid
- (1) 8 oz. Plastic Funnel
- (1) 1" x 1 ¼" Piece of Window Screen
- (1) Box Cutter
- (1) Hot Glue Gun and Glue Stick

Directions: Using a permanent marker, draw one circle with a 2" diameter in the center of the lid and one rectangle with a ½" width and 1" length toward the edge of the lid as shown below:

Using your box cutter, cut out the circle and rectangle. Sink the funnel into the circular hole so the funnel will be pointing inside the plastic mixing container. Secure the funnel to the lid with hot glue. Next, place the 1" x 1 ¼" piece of window screen over the rectangular hole and secure it in place with the hot glue. Please note that the hot glue should only be placed on the top portion of the lid and not on the bottom portion of the lid. Oxyops may get stuck to the glue if it is placed on the bottom of the lid. Allow it to dry for at least five minutes.
